## Objective

---

As a highly motivated Computer Engineering student with a strong foundation in software development and a passion for technology, I am seeking an opportunity where I can apply and further enhance my technical skills. I am eager to contribute my problem-solving abilities, adaptability, and dedication to excellence to a dynamic team, while gaining real-world experience in the field of computer engineering.

## Education

---

**Pimpri Chinchwad College of Engineering Pune**

**Jan 2021 – Jun 2024**

*Bachelor of Technology, Computer Engineering, CGPA – 8.98*

*Pune, Maharashtra*

## Experience

---

**PTC**

**Jul 2023**

*Android Developer Intern*

*Pune, Maharashtra*

- Developed and maintained Android applications using Java, Android Studio, and Android SDK
- Collaborated with the development team to design and implement new app features, enhancing the overall user experience.
- Conducted code reviews and performed debugging to identify and fix issues
- Demonstrated the ability to learn new technologies and programming concepts quickly, which led to taking on additional responsibilities.

**Reformup Solutions**

**April 2023 – June 2023**

*Android Developer Intern*

*Pune, Maharashtra*

- Developed and maintained Android applications using Java, Android Studio, and Android SDK
- Assisted in the design and implementation of the user interface and application features.

## Projects

---

**Easy Food Android Application** | *Java, Android Studio, MySQL*

[Source code](#)

- Developed an Easy Food project utilizing PHP and MySQL as the backend technology.
- Created a robust and efficient MySQL database to store and manage food-related information
- Implemented a user-friendly interface for adding, editing, and deleting food items from the database.

**Easy Travel Mobile Application** | *Kotlin, Android Studio, Firebase*

[Source code](#)

- Developed a mobile application to assist travelers in planning and organizing their trips efficiently.
- Designed and developed user-friendly interfaces implemented features like booking hotels and buses.
- Firebase is used for authentication and for storing user data.
- Functionality of user registration, login, change password, mailing is implemented.

**BMI Calculator Android Application** | *Java, Android Studio*

[Source code](#)

- The application, developed in Java, provides a simple and intuitive user interface, making it easy for users to input their height and weight information.
- The application calculates the BMI based on the user's input of height and weight. It applies the standard BMI formula, which involves dividing the weight in kilograms by the square of the height in meters.

## Technical Skills

---

**Languages:** Cpp, Python, Java, Kotlin, SQL

**Developer Tools:** VS Code, Android Studio

**Technologies/Frameworks:** Android Development, GitHub

**Others:** Data Structure and algorithms, Object oriented programming

## Achievements

---

Secured 2nd rank in GPAT organized by GFG among more than 1500 participants

Hackerrank Rating- 6\*

Leetcode Rating - 3\* (500+ questions)
